How Do You Calculate My Variable Rates? Your variable rates may change when the Prime rate changes. Any increase in the Prime Rate may increase your Interest Charges and your Minimum Payment.

What Are The Daily Periodic Rates Used To Calculate My Interest? The daily periodic rate for your Introductory Purchase APR is 0.00000%; Non-Introductory Purchase APR is 0.04175%, 0.04997% or 0.06641%; Transfer APR is 0.04175%, 0.04997% or 0.06641%; and Cash Advance APR is 0.06822%.

How Do You Calculate My Minimum Payment? If your balance is less than \$27, your minimum payment will be equal to your balance. Otherwise, your minimum payment will be the greater of \$27 or 1% of your balance plus new interest and late payment fees. We will also add any past due amount to your minimum payment. When Can I Request A Transfer? You may call to request a transfer 10 days after your Account is opened. Transfers between Capital One accounts are not permitted. That means balances cannot be transferred to this account from any other credit card issued by Capital One including, but not limited to cards branded with, Bass Pro Shops CLUB, Cabela's, Kohl's, Sony, GM, BuyPower Card, Union Plus, Walmart and Teamster Privilege.

How Do You Apply My Payment? We generally apply payments up to your minimum payment first to the balance with the lowest APR (including 0% APR), and then to balances with higher APRs. We apply any part of your payment exceeding your minimum payment to the balance with the highest APR, and then to balances with lower APRs.

How Can I Avoid Paying Interest Charges? If you pay your statement's "New Balance" in full by the due date each month, we will not charge interest on any new transactions that post to the Purchase balance. If you have been paying your Account in full without interest charges, but fail to pay your next "New Balance" in full, we will charge interest on the unpaid balance. For Cash Advances and Transfers, we will start charging interest on the transaction date. From time to time, we may give you offers that allow you to pay less than the total balance and avoid interest charges to new transactions that post to your purchase balance. If we do, we will provide details in the specific offer.

How Do You Calculate The Interest Charge? We use a method called Average Daily Balance (including new transactions). Under this method, we first calculate your daily balance; for each segment, 1) take the beginning balance and add in new transactions and the periodic interest charge on the previous day's balance, then 2) subtract any payments and credits for that segment as of that day. The result is the daily balance for each segment. However, if you paid your previous month's balance in full (or if your balance was zero or a credit amount), new transactions which post to your purchase or special purchase segments are not added to the daily balances. Also, transactions subject to a grace period are not added to the daily balances.

Next, to find your Average Daily Balance: 1) add the daily balances together for each segment, and 2) divide the sum by the number of days in the billing cycle.

At the end of each billing cycle, we determine your Interest Charge as follows: 1) multiply your Average Daily Balance by the daily periodic rate (APR divided by 365) for that segment, and 2) multiply the result by the number of days in the billing period. NOTE: Due to rounding or a minimum interest charge, this calculation may vary from the interest charge actually assessed.

How Is The Interest Charge Determined? Interest charges accrue from the 1) date of the transaction, 2) date the transaction is processed or 3) first day of the billing period. Interest accrues daily on every unpaid amount until it is paid in full. Any interest that has accrued during a billing period will post to your Account at the end of the billing period and will appear on your next statement. This means you may owe interest charges even if you pay the entire "New Balance" one month, but did not do so the previous month. For example, even if a customer pays their balance in full on a February 26th due date, interest would continue to accrue on the balance from February 2nd (the start of the Billing Cycle) through February 26th, and will appear on their next statement. Once you start accruing Interest Charges, you generally must pay your New Balance in full for two consecutive Billing Cycles before Interest Charges stop being posted to your Statement. Interest charges are added to the proper segment of your Account. However, we reserve the right to not assess interest charges.

Are Unauthorized Use Claims Subject To Investigation And Verification? Yes.
